

Noel Paul Tomy

AI Engineering Student | Full-Stack Developer | Linux Systems

Kochi, Kerala | [+91 9400198635](tel:+919400198635) | noelyt101@gmail.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

I build digital systems that grow businesses. Focused on AI workflows, full-stack products, Linux automation, and practical tools that ship.

EDUCATION

B.Tech CSE, Artificial Intelligence | 2024 - 2028

Muthoot Institute of Technology and Science

EXPERIENCE

Freelance Full-Stack Developer | 2024 - Present

Built web apps, chatbot systems, landing pages, automation scripts, and product demos for client and business use cases.

Bot and Workflow Automation | 2024 - Present

Built Telegram and Discord bots for command execution, service workflows, and rewards management.

PROJECTS

VoxAssist - AI voice assistant for doctors that turns conversations into structured clinical notes.

Zervox - Self-healing Node.js backend experiment with automated fault detection and recovery.

Synapse / AI Desktop Agent - Local AI agent experiments for desktop automation and vision-based control.

Admondo - Ad-campaign platform built with React, Next.js, TypeScript, and Firebase.

Lindy - Linux dual-boot utility for accessing Windows user folders cleanly.

Batman CLI - Linux battery and power-management command-line tool.

SKILLS

Languages: Python, TypeScript, JavaScript, C++, Bash

Web: React, Next.js, Node.js, Tailwind CSS, Firebase

AI: OpenCV, NLP, RAG, LLM tooling, Scikit-learn

Systems: Linux, Docker, GitHub Actions, Shell scripting

CERTIFICATIONS

Predictive Modeling - DevTown / MSIT · AI Python Specialist - DeepLearning.AI · AI Tools Workshop - be10x · GEM5 Workshop - MITS / ACM · Cambridge English C1
